

ART PROGRAM develops custom design IT solutions, mainly for telecommunication companies but we have significant experience in databases, CRM applications and internet portals as well. We are working onsite and in nearshore mode.

We offer:

- Customized industrial/economical software
- CRM applications
- T-Bone consultancy and implementation
- Database management
- Web programming, e-solutions
- Complete IT solutions

The success and satisfaction of our clients are assured not just by our technical knowledge, but the company's policy concerning partners as well:

- High quality
- Short delay delivering

- Continuous adaptation to the customers' preferences
- Attractive prices
